PHOTO EDITING
IN PIXLR

Directions:

1. Right-click on each picture to save it in your **Pixlr Project 1** folder as the name listed above each image.

2. Open each picture in **Pixlr** and follow the instructions next to each image in the document to make changes and corrections to the photos.

3. Save each finished photo in Pixlr as the same name over the original in your **Pixlr Project 1** folder.

DO IT YOURSELF

1. Use the Internet to find 3 of your own images to edit.

2. Save each image as:

   💾 **13 My Image**
   💾 **14 My Image**
   💾 **15 My Image**

3. Open each image in Pixlr, **duplicate the background** and use the adjustments, filters, and tools to edit the original.

4. Once you are finished, use the selection tool to delete half of the image so that the original and the edited pictures appear side by side.

5. Use text to label which side is the original and which is edited.

6. Save the images as the file names listed above.
